
ADDITIONAL SLIDES

travis – continuous integration

- ▶ Similar to BioC build report: virtual machines are set up to build and check the package.
- ▶ Pros:
 - ▶ Free, only requires a GitHub account authorisation.
 - ▶ No pre-install R packages.
- ▶ Cons:
 - ▶ Servers running R does not support Windows (appveyor supposed to fix this, but it is more buggy)
 - ▶ Only has released version of R, i.e. clashes with BioC.
